SUPPLEMENTAL AMENDMENT

Dear Sir:

In response to the Office Action mailed , please amend the above identified case as follows.

IN THE DRAWINGS

Enclosed is a markup of Figure 33 for approval by the Examiner.

Remarks

The undersigned noticed, after filing the amendment in response to the Office action mailed 7/15/97 on 11/15/97, that one of the drawings showing a cross section of the finished device has an error. Specifically, the error is that bit line 122 is shown as shorting the P region acting as the transistor channel region to the N regions acting as

the source and drain. This short occurs because the P-type channel region and the N-type source region are shown as coming to the surface which they should not do at least in the vicinity on the surface where the bit line will short them together. The undersigned believes that those skilled in the art will appreciate this fact, and, since Figure 5 shows a correct cross section of the completed device, no new matter issue is raised by this change.

All claims are believed to be in condition for allowance, and favorable action is earnestly solicited.

Respectfully submitted,

Ronald C. Fish
